

REAL-MONEY GAMING PLATFORM

The complete gaming platform, ready to launch.

25 provably fair games, one INR wallet, rewards that bring players back and an admin console that controls everything — built for phones first.

WHY PLAYZONE

Everything a modern gaming platform needs.

PlayZone brings crash, lottery-style round games, card games and instant originals into one app with one wallet — with a server-side engine behind every round, a ledger behind every rupee, and controls that protect the house without touching a single result.

25

Games, ready to play

4Timers per round
game (30s–5m)**100%**

Provably fair results

24/7

Live round engines

**25-game library**

Aviator, Color Predict, Fortune Wheel, Andar Bahar, Teen Patti, Mines, Plinko and 18 more — all in one lobby.

**One INR wallet**

A single balance across every game, with a full statement of every deposit, bet, win and bonus.

**Provably fair**

Every result comes from a server seed whose hash is published before the round and revealed after it.

**House control**

Daily loss guards per game, max bet and daily-win limits per player, and payout caps per round.

**Rewards engine**

Daily check-in streaks, 6 VIP levels, weekly cashback, promo codes, referrals and a leaderboard.

**Admin console**

Live games, reports, player profiles, wallet adjustments and every setting — no code changes needed.

A real engine behind every round

Round games run clock-aligned periods on the server for every timer; bets lock before the end, results are drawn from the round's seed and settled to every wallet in one transaction.

Settings live in the database

Payouts, timers, bet limits, banners, bonuses and protections are all tables an admin edits from the console — the app reads them live.

THE GAME LIBRARY

25 games. One lobby.

A lobby players actually enjoy: banners, sections, search, favourites and recently played — and every card, title, badge and banner is managed from the admin console.

Crash

1 game

- **Aviator** the classic multiplier crash game, two bets per round

Live round games

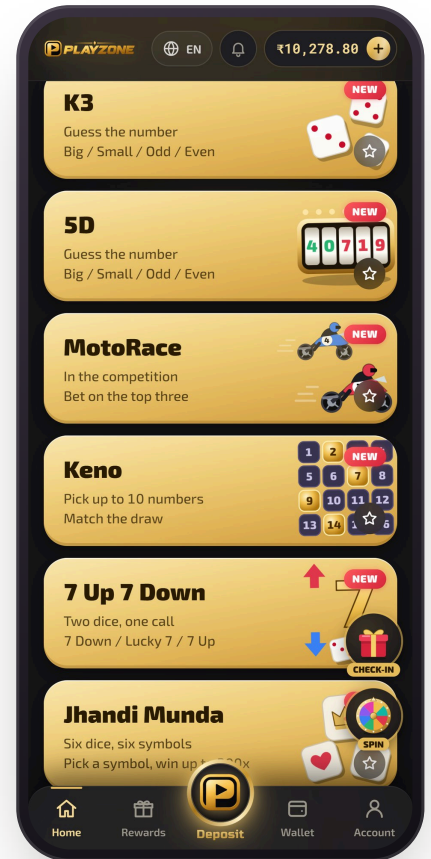

14 games · 30s, 1m, 3m & 5m timers

- | | |
|-----------------|-----------------|
| ● Color Predict | ● Fortune Wheel |
| ● K3 Lottery | ● 5D Lottery |
| ● Andar Bahar | ● Dragon Tiger |
| ● Teen Patti | ● Lucky 7 |
| ● 7 Up 7 Down | ● Jhandi Munda |
| ● Roulette | ● Coin Flip |
| ● MotoRace | ● Super Over |

Instant originals

10 games · result in a second

- | | |
|----------------|----------------|
| ● Mines | ● Plinko |
| ● Limbo | ● Keno |
| ● Hi-Lo | ● Chicken Road |
| ● Dice | ● Tower |
| ● Balloon Pump | ● Spin |

The lobby — sections, game cards and favourites.

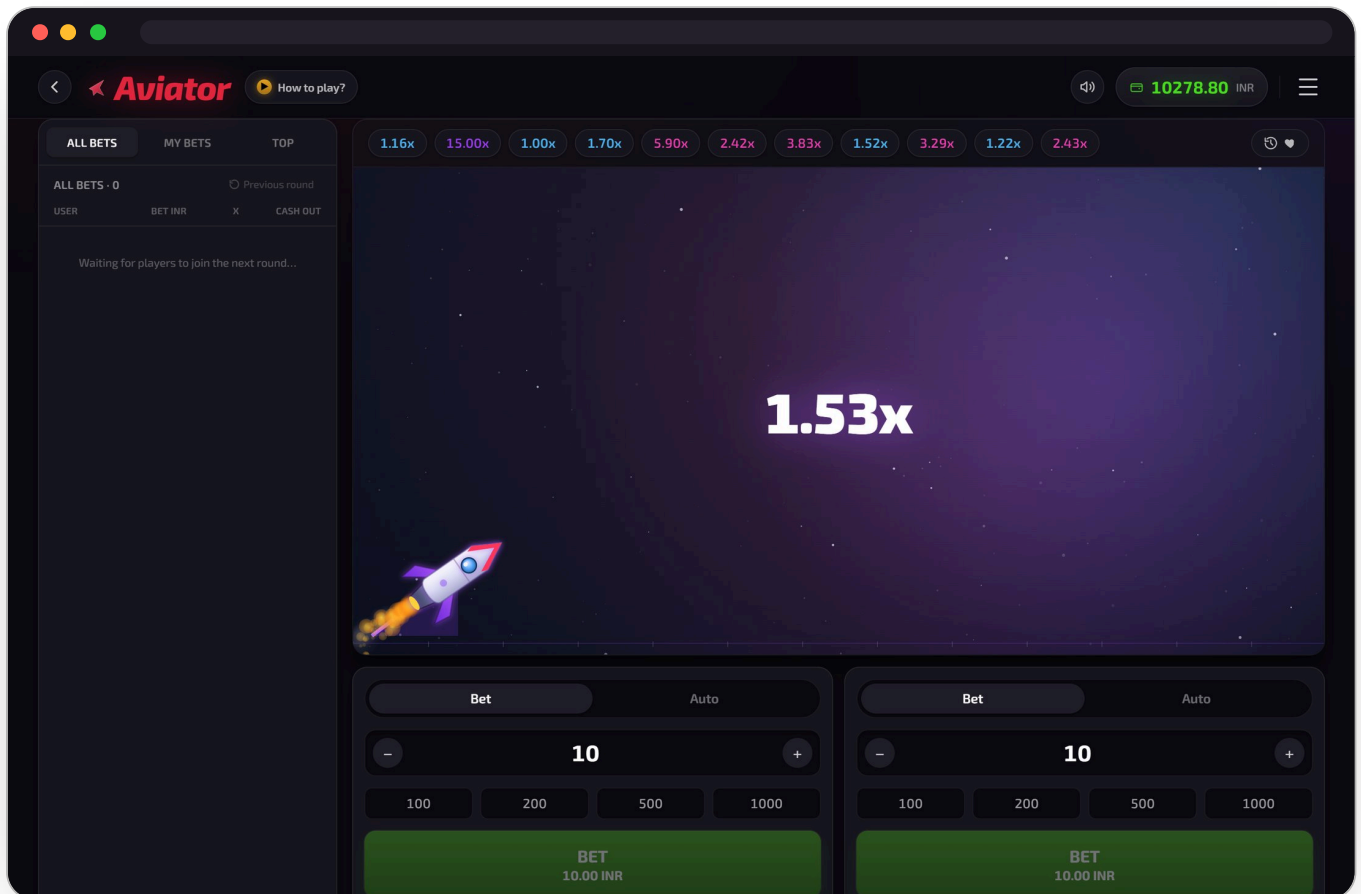

Open, close or rename any game

Each game can be paused with a message, hidden from the lobby, re-ordered or given a badge ("NEW", "HOT") in seconds.

CRASH · AVIATOR

The game everyone knows how to play.

The plane takes off, the multiplier climbs, and players cash out before it flies away. Rounds run back to back on the server, with every crash point fixed by a seed published before take-off.

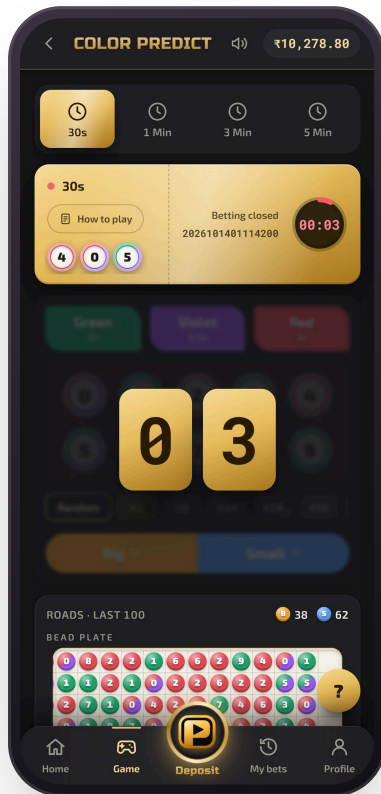

Aviator in flight — two bet panels, the live multiplier and the last rounds' results.

- ◆ **Two bets per round** from two independent panels.
- ◆ **Recent multipliers** bar so players read the game at a glance.
- ◆ **Betting window, limits and payouts** set from the admin console.
- ◆ **Auto mode** for players who play the same bet again and again.
- ◆ **Provably fair** crash points from a hashed server seed.
- ◆ **Never revealed early** — the crash point of the round in flight is never shown, even to admins.

LIVE ROUND GAMES

Everyone plays the same round.

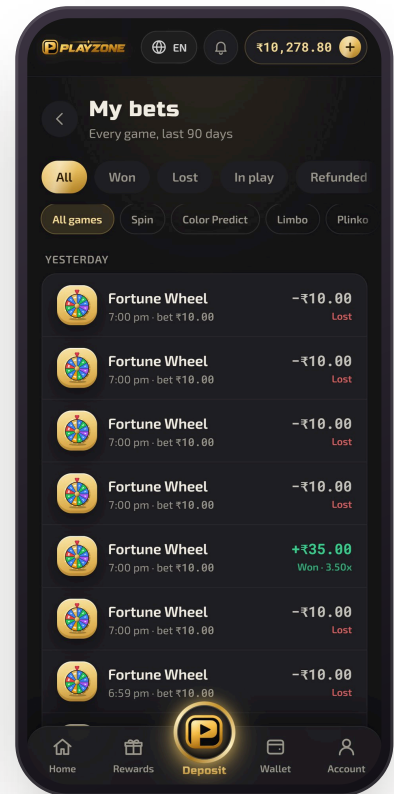

Color Predict, Fortune Wheel and twelve more games run shared, clock-aligned rounds: a period number, a countdown, betting that locks before the end, and a result everyone sees at the same moment.

Color Predict — timers, countdown and road map.

Fortune Wheel — one wheel, every player.

My bets — every game, won or lost.

- ◆ **Four timers per game** — 30 seconds to 5 minutes, each with its own period numbers.
- ◆ **Results history and trends** — road maps, latest results and hot/cold numbers.
- ◆ **Payouts and odds per option** with the return-to-player shown to admins.
- ◆ **Multi-pick bet sheet** with quick amounts and multipliers.
- ◆ **Seed revealed after every round** so any result can be re-checked.
- ◆ **Instant settlement** of every bet in one database transaction.

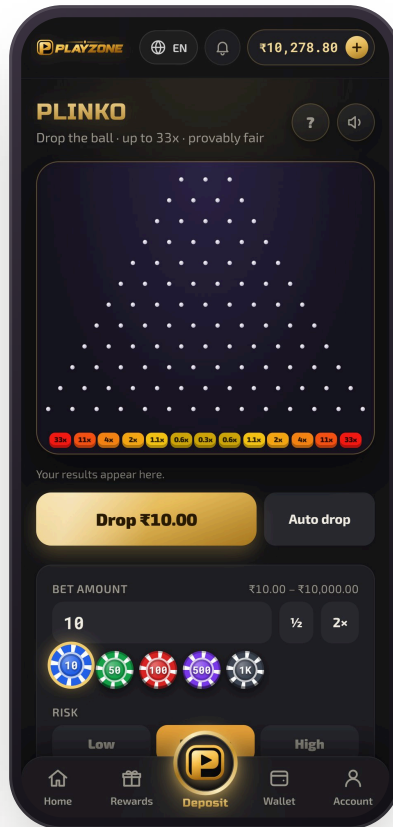

INSTANT ORIGINALS

A result in a second, every time.

Ten single-player games with no waiting: drop a ball, open a tile, climb a tower or pump a balloon — and cash out whenever you like on the games that build up a multiplier.

Mines — find the gems, dodge the mines.

Plinko — up to 33x per drop.

**Instant**

Settled the moment the player acts — no rounds to wait for.

**Cash out any time**

Mines, Tower, Chicken Road, Hi-Lo and Balloon Pump grow a multiplier step by step.

**Adjustable risk**

Rows, mines, targets and risk levels with payouts set per game by the admin.

**Seeded and verifiable**

Player and server seeds behind every result.

THE PLAYER APP

Built for the phone in their pocket.

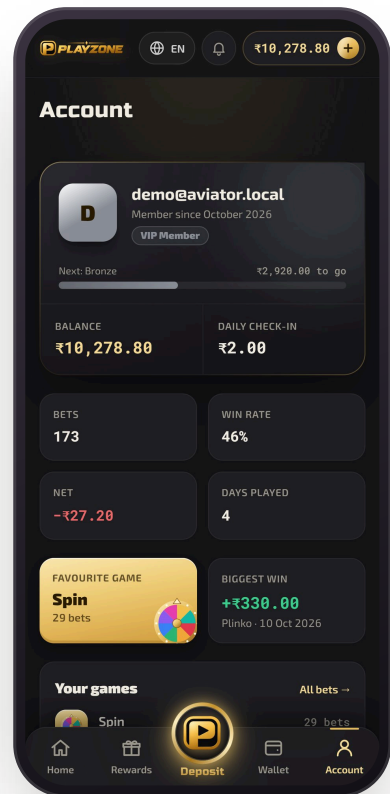

Players sign in with their mobile number and get an app that feels native: install it to the home screen, play in their own language, and see every rupee in one wallet.

Lobby with search, favourites and recently played.

One wallet for every game.

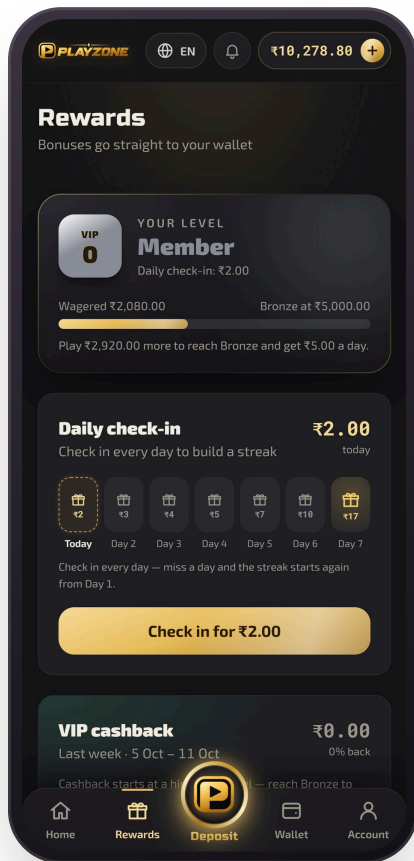

Account — VIP level and stats.

- ◆ **Mobile-number sign-in** with country codes and password strength rules from settings.
- ◆ **12 languages** — English plus Hindi, Bengali, Telugu, Marathi, Tamil and six more.
- ◆ **Install to home screen** as an app, with push notifications for bonuses.
- ◆ **Win celebrations** — coin bursts, BIG and MEGA WIN screens and sounds.
- ◆ **My bets, transactions and inbox** — the full history in one place.
- ◆ **Change password** that signs every other device out.

REWARDS & RETENTION

Reasons to come back every day.

A complete rewards engine, configured from the admin console: amounts, levels, streaks, codes and notifications are all settings, not code.

Rewards — VIP level and daily check-in.

Daily check-in

A bonus every day, with a streak cycle that pays more for coming back.

6 VIP levels

Member to Diamond by amount wagered, each with a bigger check-in bonus.

Weekly VIP cashback

A share of last week's net loss back, by VIP level, with a cap.

Promo codes

Codes with amounts, usage limits and dates for every campaign.

Refer & earn

Invite links shared on WhatsApp and Telegram; both sides rewarded on the first deposit.

Push & inbox

Broadcasts to everyone, a VIP tier or one player, plus automatic bonus reminders.

Leaderboard & live winners

Today's and this week's biggest wins on a podium, and a live winners feed in the lobby — real wins only, shown under player pseudonyms.

FAIRNESS, SAFETY & CONTROL

Fair to players. Safe for the house.

Results are never chosen by anyone — not even an admin. The house is protected by limits and guards that act on bets, never on outcomes; players get tools to keep play in check.

**Provably fair, end to end**

A seed's hash is published when a round opens and the seed revealed when it settles, so any player can re-check the result.

**House Control**

A daily loss guard per game pauses new bets when the house has lost its limit today; default and per-player max bet and daily-win limits.

**Risk caps & alerts**

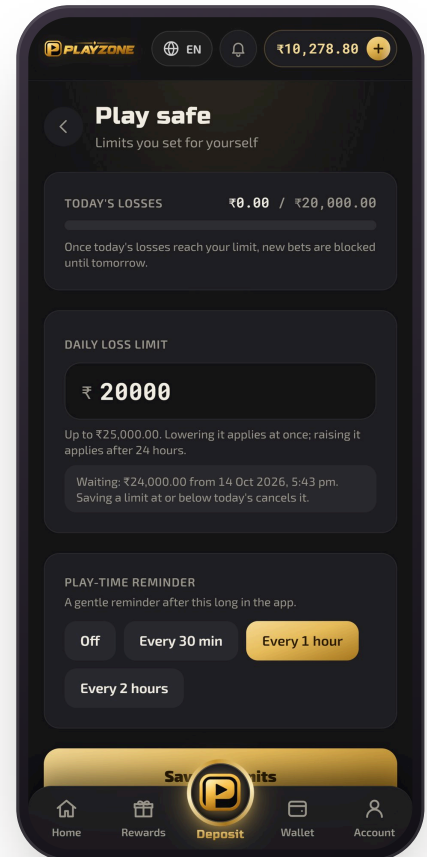

A cap on what one option can pay in a round, with alerts on large exposures and unusual wins.

**Play safe, for players**

Own daily loss limit (raising it waits 24 hours), play-time reminders and breaks that can't be cut short.

**Secure by design**

Every balance change is a ledger row with before and after; hashed passwords, rotating tokens, rate limits and a full audit log.

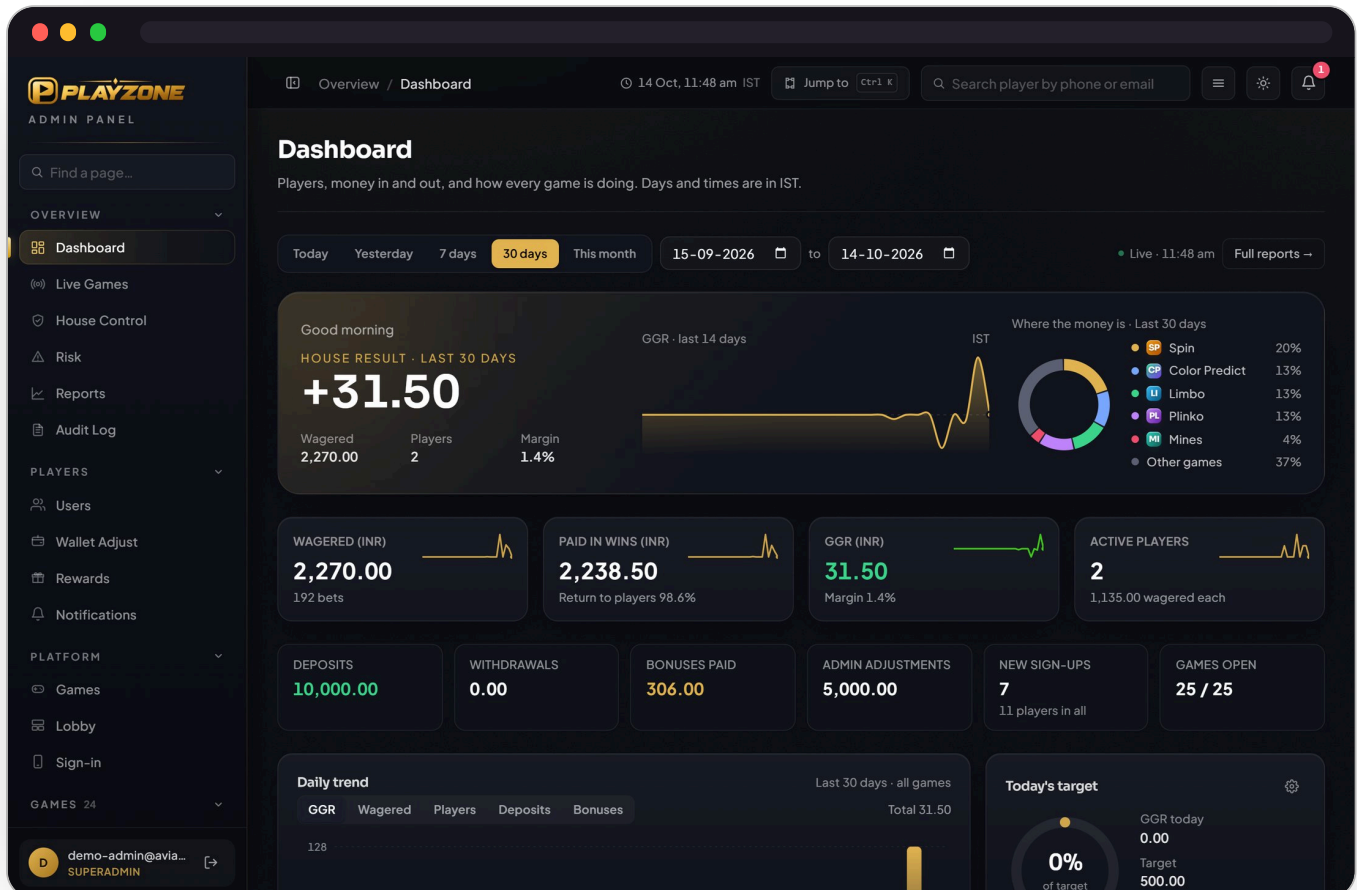

Play safe — the player's own limits.

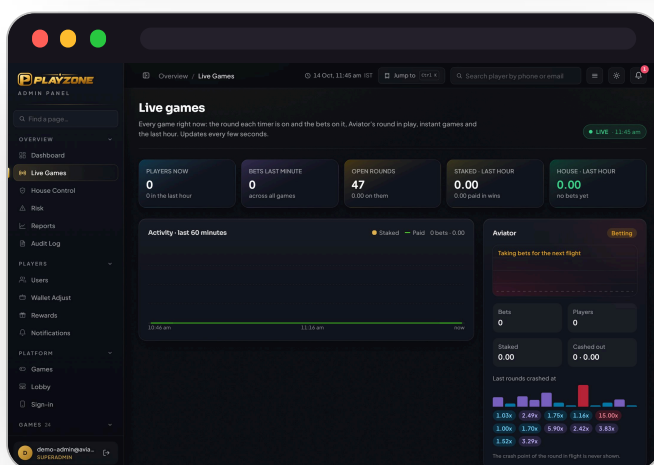

FOR YOUR TEAM

A complete admin console.

One control panel for the whole business — what's happening right now, how every game is doing, and every setting behind the app. Light and dark themes, works on a phone too.

Dashboard — house result, trends, where the money is, today's target and live activity.

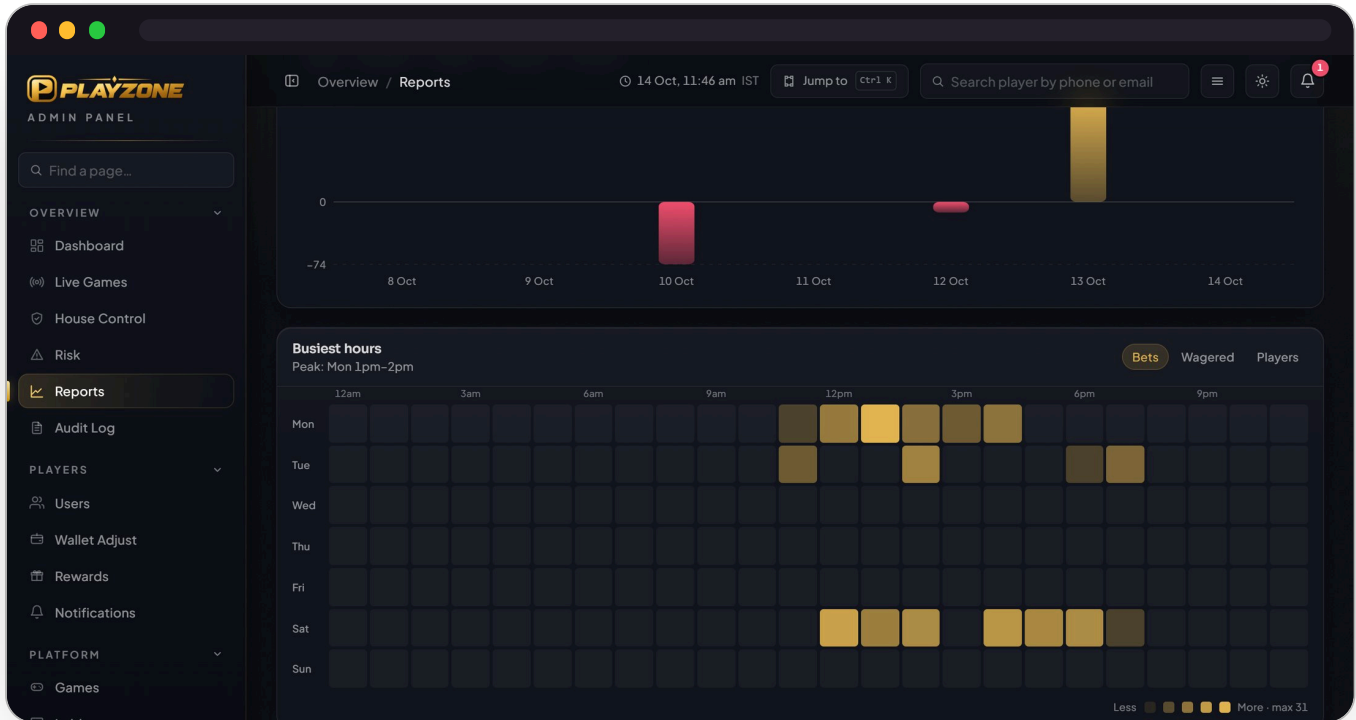

Live games — every round in play and the bets on it.

- ◆ **Live games** — open rounds, bets per option and Aviator's flight.
- ◆ **Activity feed** — wins, deposits, withdrawals and sign-ups as they happen.
- ◆ **Daily GGR target** with pace for the time of day.
- ◆ **Players** — search, suspend, limit and adjust wallets with a reason.
- ◆ **Audit log** of every admin change, with before and after.

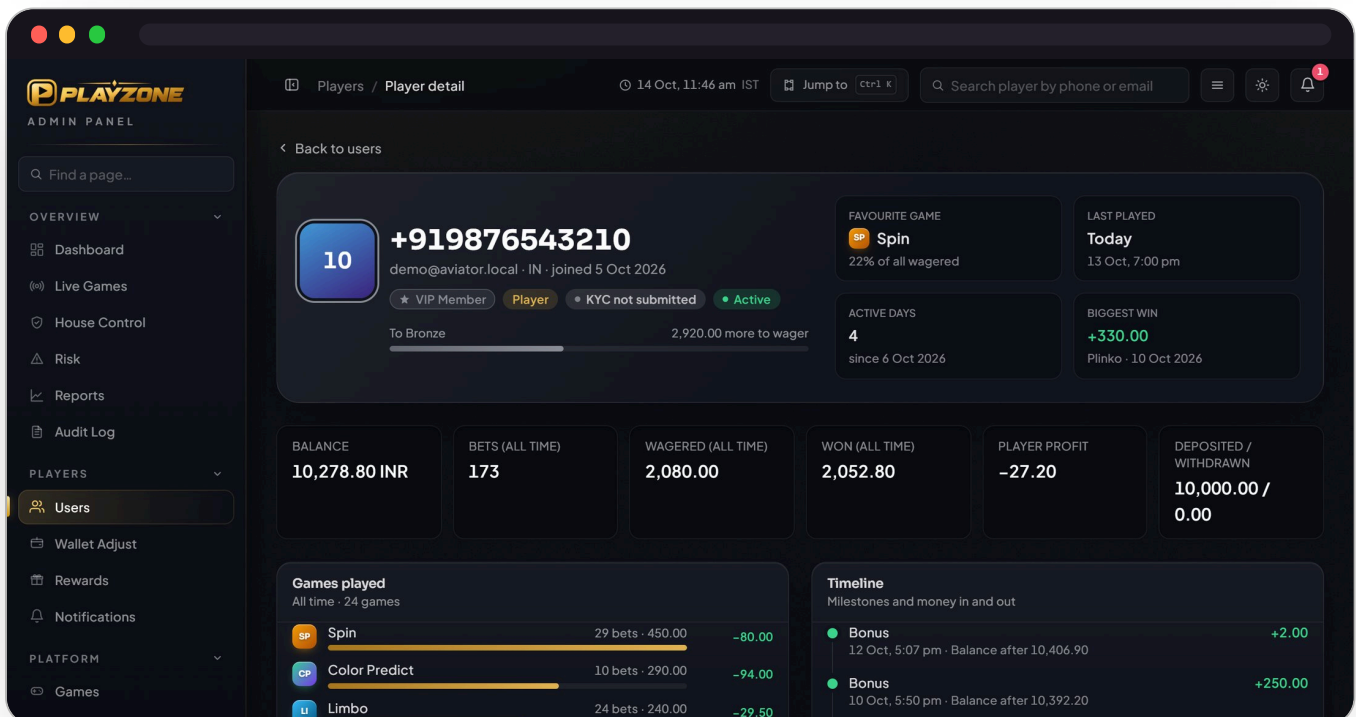

REPORTS & INSIGHTS

Know every rupee and every player.

Profit and loss by day, game and player straight from the wallet ledger, in your time zone — with exports to CSV and branded PDF.

Reports — daily trend and the busiest hours by weekday.

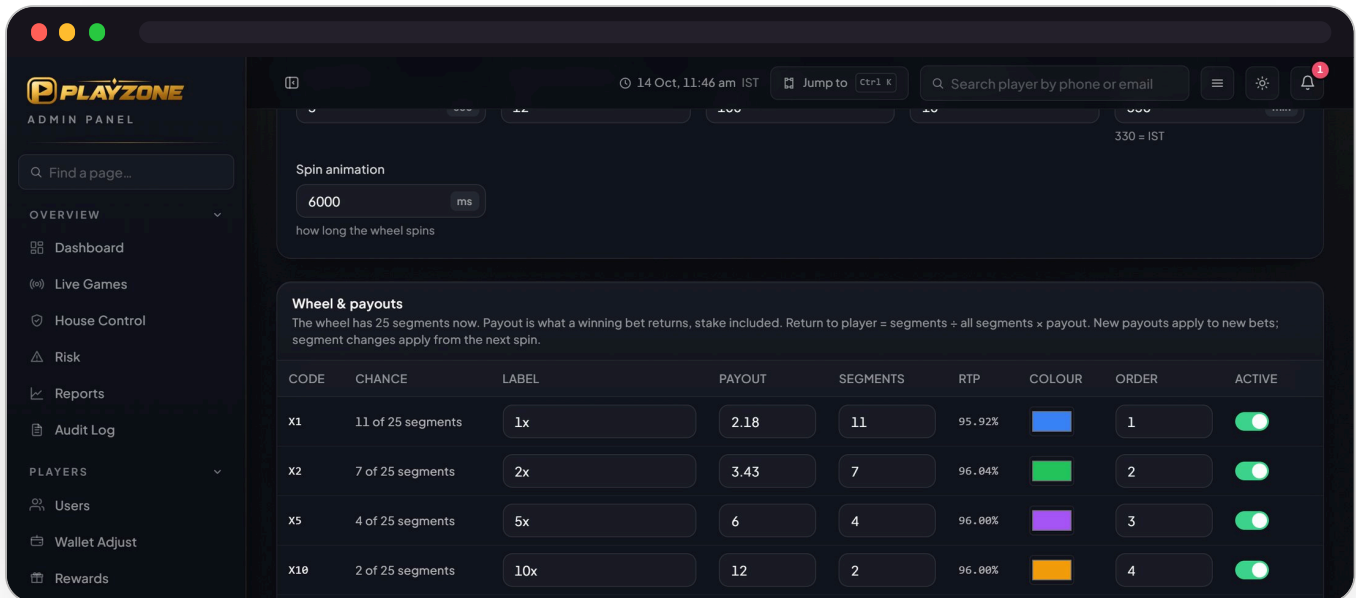

Player profile — VIP progress, favourite game, games played and a money timeline.

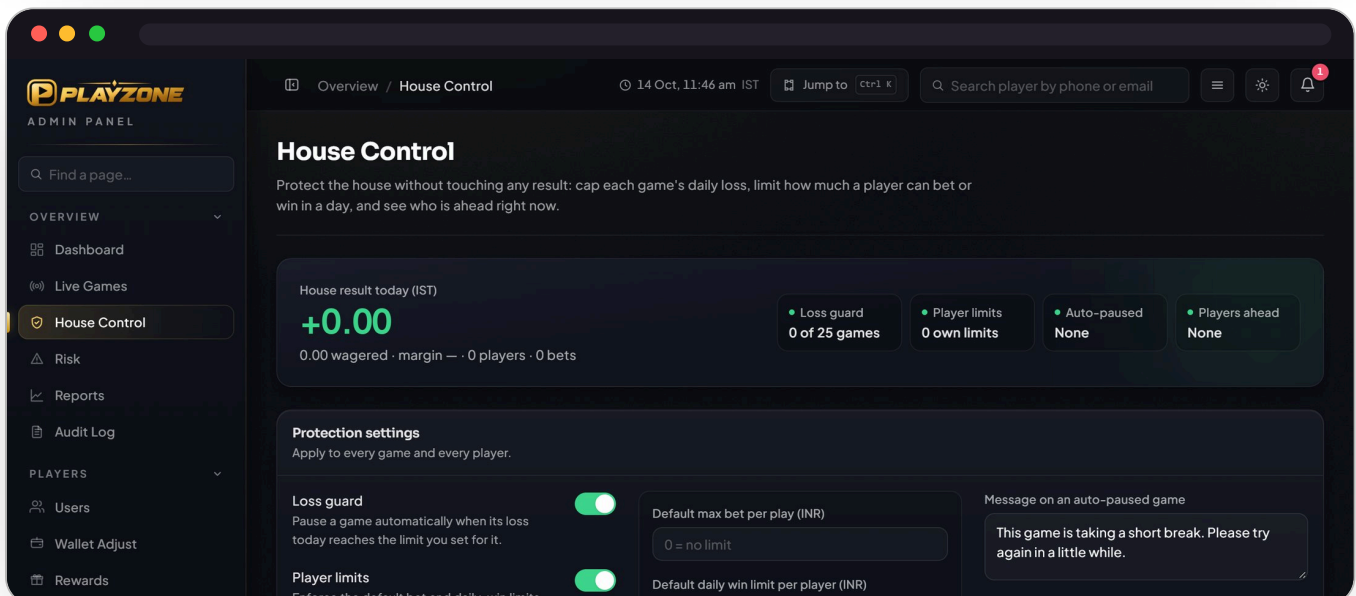

CONFIGURE EVERYTHING

Change the game, not the code.

Every number players see is a setting. Change a payout, a timer, a bonus or a banner in the console and it applies from the next round — every change audited.

Game settings — payouts, segments and live RTP per option.

House Control — loss guards and player limits.

Games

Payouts and odds, timers and lock windows, bet limits, fees and bet-sheet chips — per game, with return-to-player shown.

Lobby & brand

Brand name and logo, banners with schedules, notices, sections, game cards, badges and shortcuts.

Money & players

Deposit and withdrawal limits and methods, rewards, VIP levels, sign-up rules, country codes and support contacts.

HOW IT WORKS

From sign-up to **first win.**

The whole journey a player takes on PlayZone — every step recorded for the player and your team.

1**Sign up with a mobile number**

Country code, number and password; an optional invite code links the referral. A welcome guide shows the way around.

Mobile sign-in

Referral

Welcome guide

2**Add money**

Choose an amount and a method; the balance is ready for every game. Plugs into your payment gateway.

One INR wallet

UPI / bank / card

3**Play any of 25 games**

Crash, live round games, cards and instant originals — with limits checked on every bet.

Aviator

Round games

Instant originals

4**Win and settle instantly**

Results come from published seeds and settle straight to the wallet, with a celebration on every win.

Provably fair

Instant settlement

5**Earn rewards and withdraw**

Daily check-in, VIP cashback and referral bonuses; withdrawals to the player's own bank account or UPI ID.

Rewards

Bank / UPI payout

**Protection wraps every step**

Ledger-backed balances, House Control limits, risk caps, responsible-gaming tools, rate limiting and a full audit trail — so players, money and the house stay protected end to end.

GET STARTED

See PlayZone live.

We walk you through the platform, set it up with your brand, games and limits, and support you through launch — so you can go live quickly and confidently.

1

Live demo

A guided walkthrough of the games, the player app and the admin console.

2

Set-up & branding

Your name, logo, games, payouts, bonuses and limits configured for your market.

3

Launch & support

Deployment, payment-gateway hook-up, hardening and hands-on support after go-live.
